LETTER OF SCHOLARSHIP APPLICATION

Dear Massachusetts Institute of Technology,

My name is **Nguyễn Văn Lộc**,

I am currently a sophomore at the Faculty of Information Technology,
University of Science, Vietnam National University.

Email: vanloc1808@gmail.com

Tel: +84905481342

Today, I write this letter to apply for the full-tuition scholarship at the
Massachusetts Institute of Technology.

I grow up in a typical family in Vietnam, with both my father and my mother
being popular laborers. Therefore, I always have a will to have higher education
in order to have a small part in the development of my country, and the world. I
understand that learning is the shortest way to success. Since I was a child, I
have spent most of my time studying and researching, always finding new
documents from the books and the Internet, and I have reached some
achievements:

- Second Prize, Provincial Mathematical Olympiad for Grade 12, 2019.
- Consolation Prize, The "Youth with Marxism - Leninism Sciences and Ho Chi Minh's Ideology" Competition of University of Science, VNUHCM, 2021.
- Participation in some ICPC competitions and other programming contests.
- Participation in research with my professors.

I am aware of the fact that my learning path has just started. In the future, I want
to invent new technologies to make life easier for humans. As a result, I begin to

approach advanced programs. Massachusetts Institute of Technology is the best university in Data Science. Moreover, I want to become an expert in Data Science. Therefore, I write this letter in order to apply for a scholarship in the Doctor of Data Science program at the Institute. With my achievements, I am confident that I will be accepted to this program.

I am looking forward to hearing from the Institute soon.

Yours sincerely,

Nguyễn Văn Lộc
